**The Fight To Protect Atlanta's Freedom!**

## **Statement from ROOSEVELT The People's Mayor of Atlanta**

I would like to send my full support and condolences to all American & non American families and victims left behind in Afghanistan. My administration is deeply saddened to find out that this type of leadership was displayed and we want every Atlantan to know that **The People's Mayor Of Atlanta** will protect this city at any and all cost.

With that being said, the recent news from the White House regarding mandatory vaccinations troubles me and not only me, but the millions of Americans who still believe in the Constitution, Freedom and peace. Our rights are being trampled upon by this current local and federal administration. The fact that anyone thinks it is logical to require 80+million Americans to get tested like cattle or jabbed like sheep, is totally outrageous and ignorant to the facts surrounding our Freedoms. The CDC, WHO and others are all in collaboration to keep America down!

OSHA and the Department of Labor would be in direct violation of our right to choose...Those who are fighting for abortion rights should also be fighting for vaccination rights. My body. My choice. Right? What about the rumors of concentration camps for the unvaccinated? By any means necessary go get vaccinated if your heart desires but it should never be mandatory for the free citizens of America.

Atlanta. Things are about to get even crazier than they already are. As your candidate for Mayor I promise to not give up this fight. We have to ban together and show these tyrannical administrations that their time is up!

Upon Inauguration, my administration will review all legal advice and implement several executive orders protecting the rights and freedoms of Atlantans. **We will not be dictated! We will not be controlled! We are not sheep! We are ATLANTA!**

\*\*\*

*Roosevelt Searles III*  
The People's Mayor Of Atlanta
